TINY HANDS TALKING is a sign language enrichment class which introduces hearing children to the world of sign language. Through music, early reading skills, children's literature and hands-on activities children will discover the joy and benefits of a second language. Your child will have the opportunity to engage in creative sign language activities that combine visual, auditory, tactile and oral learning. "Research indicates that learning a second language stimulates a child's cognitive development. Sign language develops more of the brain than learning a spoken language" (Dr. Marilyn Daniels).
